WOLVERINE WORLD WIDE REPORTS STRONG THIRD QUARTER RESULTS AND MAINTAINS FULL-YEAR REVENUE OUTLOOK

In line revenue growth and record gross margin lead to 10% adjusted EPS growth, ahead of expectations for Q3

Rockford, Michigan, November 7, 2019 - Wolverine World Wide, Inc. (NYSE: WWW) today reported financial results for the third quarter ended September 28, 2019. The Company also provided an update on its full-year 2019 outlook.

"We delivered our highest quarterly revenue increase of the year driven by constant currency growth of over 11% from Merrell, Sperry and Saucony. Our adjusted earnings per share of \$0.68 was a record performance for the Company and meaningfully better than our expectations heading into the quarter," said Blake Krueger, Wolverine World Wide's Chairman, Chief Executive Officer and President. "The double-digit growth from our biggest brands is a direct result of our continued focus on building trend-right product that resonates with consumers and ongoing execution of our digital-direct offense."

THIRD QUARTER 2019 REVIEW

- Reported revenue of \$574.3 million increased 2.8% as compared to the prior year and adjusting for currency, increased 3.6%.

- The Company repurchased \$107 million of shares in the quarter at an average price of \$25.13, and has approximately \$513 million available under its authorized share repurchase programs.

NON-GAAP FINANCIAL MEASURES

Measures referred to as "adjusted" financial results exclude environmental and other related costs, business development related costs, reorganization costs, other costs, the impact of tax reform updates and a foreign currency remeasurement gain that is not expected to reoccur. The Company also presents constant currency information, which is a non-GAAP measure that excludes the impact of fluctuations in foreign currency exchange rates. The Company believes providing constant currency information provides valuable supplemental information regarding results of operations, consistent with how the Company evaluates performance. The Company calculates constant currency basis by converting the current-period local currency financial results using the prior period exchange rates and comparing these adjusted amounts to our current period reported results.

The Company has provided a reconciliation of the above non-GAAP financial measures to the most directly comparable GAAP financial measure. The Company believes these non-GAAP measures provide useful information to both management and investors to increase comparability of current period results to the prior period by adjusting for certain items that may not be indicative of core operating results and to better identify trends in our business. The adjusted financial results are used by management to, and allow investors to, evaluate the operating performance of the Company on a comparable basis. Management does not, nor should investors, consider such non-GAAP financial measures in isolation from, or as a substitution for, financial information prepared in accordance with GAAP.

EARNINGS CALL INFORMATION

The Company will host a conference call today at 8:30 a.m. Eastern Time to discuss these results and current business trends. The conference call will be broadcast live and accessible under the "Investor Relations" tab at www.wolverineworldwide.com. A replay of the conference call will be available at the Company's website for a period of approximately 30 days.

* To supplement the consolidated condensed financial statements presented in accordance with Generally Accepted Accounting Principles ("GAAP"), the Company describes what certain financial measures would have been if environmental and other related costs, business development related costs, reorganization costs, other costs, the impact of tax reform updates and a foreign currency remeasurement gain that is not expected to reoccur were excluded. The Company believes these non-GAAP measures provide useful information to both management and investors to increase comparability to the prior period by adjusting for certain items that may not be indicative of core operating measures and to better identify trends in our business. The adjusted financial results are used by management to, and allow investors to, evaluate the operating performance of the Company on a comparable basis.

The constant currency presentation, which is a non-GAAP measure, excludes the impact of fluctuations in foreign currency exchange rates. The Company believes providing constant currency information provides valuable supplemental information regarding results of operations, consistent with how the Company evaluates performance. The Company calculates constant currency by converting the current-period local currency financial results using the prior period exchange rates and comparing these adjusted amounts to our current period reported results.

Management does not, nor should investors, consider such non-GAAP financial measures in isolation from, or as a substitution for, financial information prepared in accordance with GAAP. A reconciliation of all non-GAAP measures included in this press release, to the most directly comparable GAAP measures are found in the financial tables above.
